Subject: Tracking Cullinet Personnel

STAT

As you can see by the number of people this note is going to, we have a lot of Cullinet activity amongst us.  and I have been trying to track the use of Cullinet people and be able to project the proper amount of funding required to carry us through September. I would ask that each of you bring me up to date as of the end of June with monthly totals for each person. Please include all totals from October through June.

As important as the past is the future. Please give me a number of hours for July, August, and September for each person you plan to utilize. By combining these numbers, I can tell if I need to add money to the contract. Also, I have estimated hours from Cullinet and I would like to see if your expectations are the same as theirs.

This is a very important exercise -- please give it some thought. If we put in too much money, we lose it - not enough, it gets taken out of our hide (or somewhere)

Please respond NLT 6 July. I need time to process the paperwork required to add money to the contract.

STAT

..... thanx
